To Whom It May Concern,

This is a recommendation letter for Mr. Nima Majidi who has applied for your graduate program in Electrical Engineering.

I have known Nima since last semester when he took my Neural Networks course in which he ranked 5th in the class of 28 students. I should mention that Neural Networks is a graduate course and Nima, who is an undergraduate student, took it as an elective course. During the semester, I found him a very enthusiastic and diligent student. He did all the computer projects of the course correctly and submitted most of them before the deadline. From the moral points of view, he is a very nice and polite person. He had good relation with other students of the class and helped them in studying the course.

Considering the above points, I highly recommend Nima for your graduate program and I am sure he will be successful in his graduate study.

Sincerely,

M. Mirsalehi
